...and the

[illegible]

The graph illustrates the relationship between frequency and wavelength. The x-axis represents Wavelength and the y-axis represents Frequency. A diagonal line shows that as frequency increases, wavelength decreases. Key points on the line are labeled with values: 200KHz, 5°, 0.3-600m, 30, 14, 0.01, 8m, and 15 m.
